PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of hands-on web development experience building websites, e-commerce platforms, business applications and independent software products. Currently pursuing a BSc in Computer Science at Kwara State University, Malete (KWASU), with expected graduation in 2027–2028. Experienced in PHP, JavaScript, Python, HTML, CSS, MySQL, Firebase, APIs, WordPress and Progressive Web Applications. Developed and deployed ShopLink NG, a live marketplace platform with 45+ users, and TrustW, a digital-asset wallet simulator demonstrating real-time application architecture, authentication, transaction management, permissions and PWA development.

TECHNICAL SKILLS

Programming: JavaScript, PHP, Python, HTML5, CSS3

Frontend: Responsive Web Design, Tailwind CSS, Progressive Web Apps (PWA), UI/UX implementation

Backend & Data: PHP, MySQL, Firebase Realtime Database, Firebase Authentication, Cloud Functions

APIs & Integration: REST/API integration, Paystack API, Google Maps API, CoinGecko API

Tools & Platforms: Git, GitHub, Netlify, WordPress, WooCommerce

Application Development: Authentication, user permissions, real-time data, transaction management, e-commerce, marketplace systems, POS/business applications

PROFESSIONAL EXPERIENCE

SELF-EMPLOYED FULL-STACK WEB DEVELOPER | Nigeria | 2023–Present

- Design, develop and maintain websites and web applications for businesses and independent software projects.
- Develop responsive web interfaces using HTML, CSS and JavaScript and backend functionality using PHP and database-driven architectures.
- Integrate third-party APIs and online payment services into web applications.
- Develop e-commerce platforms and custom business applications based on client requirements and operational workflows.
- Deploy, maintain and troubleshoot applications, hosting environments, databases and integrations.
- Implement authentication, user permissions and account-management functionality where required.
- Work directly with clients to understand requirements, develop technical solutions and deliver completed projects.

INDEPENDENT SOFTWARE DEVELOPER | 2023–Present

- Develop independent software products to strengthen practical experience in application architecture, databases, APIs, authentication, real-time systems and deployment.
- Design and implement complete applications from concept through functional MVP development and iterative improvement.

SELECTED PROJECTS

SHOPLINK NG — Full-Stack Developer & Product Owner

Technologies: PHP, MySQL, JavaScript, Paystack, Google Maps API, PWA

Live marketplace and storefront platform connecting buyers and sellers; currently serving 45+ users.

- Designed and developed the platform from concept through deployment.
- Built marketplace and seller storefront functionality.
- Implemented PHP/MySQL backend functionality and integrated Paystack and Google Maps API.
- Implemented PWA functionality for improved mobile accessibility.
- Responsible for product development, technical decisions, deployment and ongoing maintenance.

Website/Demo: shoplinkng.com

TRUSTW — Full-Stack Developer & Product Owner

Technologies: JavaScript, Firebase, Cloud Functions, Tailwind CSS, PWA, Netlify

Digital-asset wallet simulator/MVP exploring real-time application architecture and financial application workflows.

- Implemented authentication, real-time balances, transaction history, receipts and permission controls.
- Built administrative user and transaction management functionality.
- Implemented multi-currency display, responsive UI, themes and PWA functionality.
- Deployed the development application through Netlify.
